

Case Study

A Somerset College invited Reflect Catering Consultancy Ltd to complete a review of their catering services and to identify the loss of profit and to assess which direction the college needed to go to improve their overall performance.

We submitted our review with recommendations and an implementation plan to bring the college back into profit and improve upon their services and costs.

Our approach was to work with the college to implement the following changes:

- ◆ Reschedule the staff to accommodate the services and peak periods.
- ◆ Implement a financial control system to obtain quality information for each area, allowing for complete control on costs.
- ◆ Complete a stock control system linking to the financial system for better control on purchases.
- ◆ Complete a sales analysis of all products with a gross profit margin which is achievable.
- ◆ Evaluate the suppliers to reduce costs and to buy locally to support the area.
- ◆ Introduce new menu ranges for all locations completely costed and priced.
- ◆ Market the services internally with signage and directional signs for each location.

We achieve all the above and more for our Client. The College is now enjoying a budgeted return to profit with a quality catering services for their students and staff.

"Well done, Reflect Catering Consultancy Ltd a great job we have learned a lot from you, thank you. We look forward to our next review with you".

Catering Consultants
